

INJ01
NB: REV1.0 ----- TECNOVIDEO INJECTOR Single Port PoE/PoE+/PoE++ PSE Controller INJ01

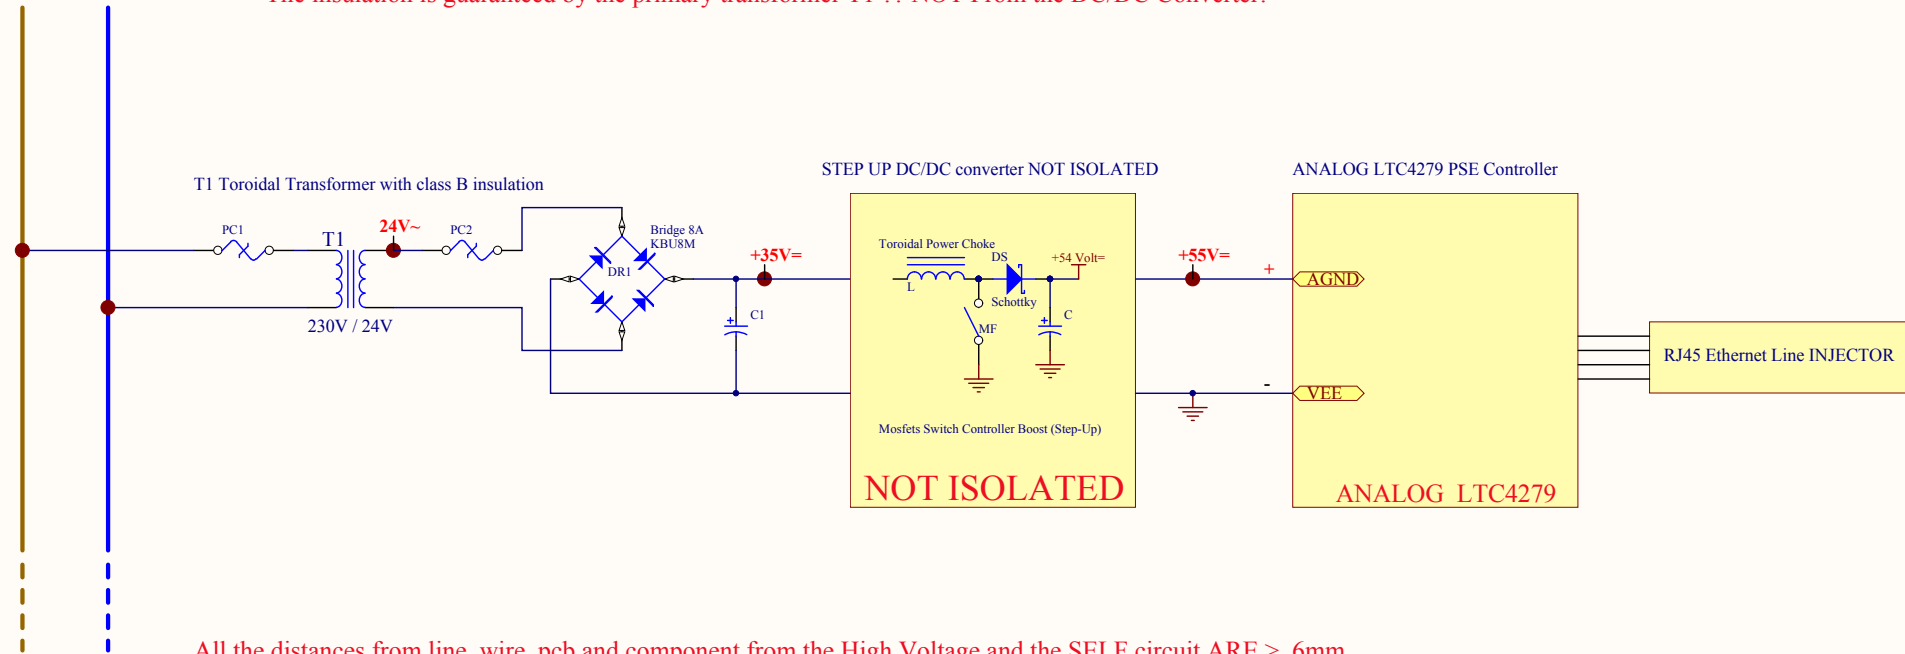

Notepad:
 PoE Injector (PSE Controller):
 1) Endpoint PSE: provides data and power, typically used to build new PoE networks.
 2) Midspan (Injector): provides power and passes data typically used to add PoE capability to existing non-PoE networks.
 3) Extender (Power Forwarder): provides data and power, typically used to extend PoE networks beyond 100m.

230V~ NETZ MAIN SUPPLY

Line Neutral

The insulation is guaranteed by the primary transformer T1 ?? NOT From the DC/DC Converter!

All the distances from line, wire, pcb and component from the High Voltage and the SELF circuit ARE > 6mm
